## SIMPLE KUBOTA CHECKS SERIES

### 1. Coolant

IN PARTNERSHIP

- ✓ Turn off your engine prior to checking. Coolant should **only be checked when the engine is cool** as surfaces can be hot and coolant level will be higher.
- ✓ As well as the level, also check the freezing point of the coolant. Especially important in Autumn/Winter.
- ✓ Drain and renew your machine's coolant every other year.
- ✓ **Never** fill the system using just water. Always refer to your operators manual for correct coolant/water mix.
- ✓ Check your expansion bottle is not cracked or damaged and the overflow hose is not perished or leaking.

**CONTACT YOUR DEALER FOR OUR TOTAL RANGE OF COOLANTS**

# BALE NOW! PAY LATER

# 0%<sup>\*</sup> FINANCE 1+8 PAYMENTS

**OFFER ENDS 30th JUNE**

## GROUND CARE MAINTENANCE

### GET YOUR MOWER READY FOR THE SEASON.

Ensure your mower is ready to return to work with Kubota's key mower operational checks. Always refer to the operator's manual (OPS) for maintenance and safety information.

#### BEFORE MACHINE START UP CARRY OUT THE FOLLOWING CHECKS:

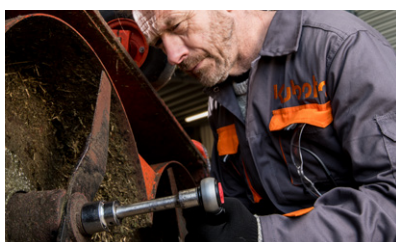

- |  |   |
|--|---|
| <input checked="" type="checkbox"/> Visual check of mower for leaks of oil or water were machine has been parked.                                | <input checked="" type="checkbox"/> Check the cutting deck for damage, belt condition and tension, check blade condition and replace if required. |
| <input checked="" type="checkbox"/> Check tyre pressure and condition as this can affect the height of cut on some models with a hung type deck. | <input checked="" type="checkbox"/> Check machine deck and drive shafts.  |
| <input checked="" type="checkbox"/> Check all oil, water & fuel levels (top up where necessary).   | <input checked="" type="checkbox"/> Check brake and HST linkages as the may have become tight or seized during lockdown.                          |
| <input checked="" type="checkbox"/> Check air filter and radiator dust screen.   | <input checked="" type="checkbox"/> Check all safety switches and operational switches.   |
| <input checked="" type="checkbox"/> Check that all safety guards are in place and not damaged.   | <input checked="" type="checkbox"/> Grease machine following OPS manual instruction.  |

#### AFTER MACHINE START UP CARRY OUT THE FOLLOWING CHECKS:

- |   |  |
|---|--|
| <input checked="" type="checkbox"/> Check meter panel for any warning messages. | <input checked="" type="checkbox"/> Again, check all safety switches and operational switches. |
| <input checked="" type="checkbox"/> Check HST and brake operation.              | <input checked="" type="checkbox"/> Check PTO control system.                                  |
| <input checked="" type="checkbox"/> Listen for abnormal noise or vibrations.    |  |

IF ANY OF THE CHECKS ARE NOT CORRECT, THEN PLEASE STOP THE MACHINE AND CONTACT YOUR LOCAL KUBOTA DEALER WHO WILL BE MORE THAN HAPPY TO ADVISE.

**ALWAYS USE APPROPRIATE PPE**

## PRE-SEASON MOWER SERVICE

**Maximise your mowing performance with a pre-season mower service.**

Our workshop team can check everything from your blade condition, to sharpen or replace as necessary, battery, brakes, mower deck and drive shafts to oil and filters. Or contact us for genuine high performance, high quality, replacement mower blades sets and parts for your Kubota.
